

Education

- Sep. 2010 – May 2015 **University of Michigan**, Ann Arbor, MI
 M.S., Ph.D. in Electrical Engineering: Systems (Signal Processing)
 Thesis: *X-ray CT Image Reconstruction on Highly Parallel Architectures*
 Advised by Jeffrey A. Fessler
 State-of-the-art image reconstruction speeds via new algorithms and GPUs
- Sep. 2006 – May 2010 **Tufts University**, Medford, MA
 B.S., *summa cum laude*, in Electrical Engineering & Mathematics

Research Experience

- May 2015 – present **University of Michigan**, Ann Arbor, MI – *Postdoctoral research fellow*
Plenoptic imaging for 3D reconstruction of translucent objects
 Collaborated with colleagues from mechanical engineering and optics
 Designed and implemented fast (GPU-friendly) model for plenoptic camera
X-ray CT reconstruction on Parallel Architectures
 Worked with GE Healthcare on next-generation GPU-based CT reconstruction
 Collaborated with colleagues in comp-sci on fast “SIMD-ized” CT model
 Mentored graduate students working on inverse problems
 Developed algorithms for distributed and multi-GPU CT reconstruction
- Sep. 2010 – May 2015 **University of Michigan**, Ann Arbor, MI – *Graduate student research assistant*
GPU algorithms
 Developed and maintained software for multi-GPU image denoising and CT
 Collaborated with GE Healthcare and GE Global Research on two patents
Duality-based methods for fast image reconstruction
 Developed fast new algorithms for CT reconstruction on modern hardware
Algorithm “building blocks” development and analysis
 Novel work on filter- and “majorizer-” design for accelerated and distributed algorithms
- Jun. 2009 – May 2010 **MIT Lincoln Laboratory**, Group 33, Lexington, MA – *Student intern*
Senior project: Signal processing for X-band inverse synthetic aperture radar
 Multi-threaded MUSIC-based algorithm for ISAR super-resolution
Over-the-horizon radar target simulator embedded system
 Implemented with USRP running modified FPGA “hardware” and C software

Technical skills

- | | |
|--------------------------|----------------------------------------------------------|
| Problem domains | Inverse problems, GPU programming, distributed computing |
| Design languages | Python, MATLAB |
| Implementation languages | C, C++, Rust, OpenCL, Java (under duress) |
| Presentation languages | L ^A T _E X, HTML/Javascript |
| Operating systems | Linux, OS X, Windows |

Teaching and mentoring

- May 2015 – present Mentor for junior group members
- Fall '11, '12, '14 Teaching assistant: Music Signal Processing
 Ran weekly labs, office hours and grading for a class of ≈ 40 students
- Summer '11, '15 Undergraduate research advisor
 Directed undergraduate students Joe Kurlito and Shamik Ganguly in GPU-related X-ray CT reconstruction projects
- Spring 2010 Tutor, Introduction to Electromagnetics
- Fall 2008 Grader, Discrete Mathematics
- Spring '07, '08 Teaching assistant, Introduction to Computer Science

Journal papers and preprints

- [1] M. McGaffin and J. A. Fessler. Alternating dual updates algorithm for X-ray CT reconstruction on the GPU. *IEEE Trans. Computational Imaging*, 1(3):186–99, September 2015.

Service

2015 – present	Reviewer, IEEE Signal Processing Letters
2015 – present	Reviewer, IEEE Transactions on Medical Imaging
2015 – present	Reviewer, IEEE Transactions on Image Processing
2015 – present	Reviewer, IEEE Transactions on Computational Imaging
2011 – 2013	EECS SPEECS Student Seminar Series – Co-organizer

Awards

2016	SIAM Early Career Award
2015	Fully3D GPU Award
2012 – 2015	Rackham Travel Grant
2013, 2015	Fully3D Travel Grant
2010	GAANN Fellowship
2010	Amos Emerson Dolbear Scholarship
2006 – 2010	IBM Watson Scholarship
